# MSc Biomedical Science

## Why choose this course?

This MSc programme aims to provide students with the underpinning knowledge and practical skills to pursue a successful career in biomedical science. The course is designed for those who wish to follow careers as Biomedical Scientists in research, the Health Service or in a Healthcare enterprise.

Using state of the art technologies and a range of skills from scientific, engineering and clinical disciplines to understand and investigate questions originating in biology and medicine. You will be introduced to science and engineering disciplines you will not have covered in your undergraduate studies.

## Course Overview

The MSc in Biomedical Science programme's primary objective is to provide students with the underpinning knowledge and practical skills to pursue a successful career in biomedical science. The course is designed for those who wish to follow careers as Biomedical Scientists in research, the Health Service or in the wider context of biomedical science including Medical Technologies, Biopharmaceutical and other Healthcare industries.

## Career Opportunities

A wide variety of career opportunities exists for graduates of this programme. These include research and development in medical technologies, pharmaceuticals, or Biotechnology in an industrial or academic setting, medical device sales, work in hospital laboratories and further postgraduate studies. Furthermore, this programme is a springboard to PhD research opportunities.

## Duration

1 year, full-time

## Average Intake

20

**The MSc in Biomedical Science at University of Galway is a truly interdisciplinary course. Courses such as tissue engineering and molecular medicine gave me insight into research that I had previously not seen.**
