MSc

Computer Science Artificial Intelligence (Online)

Why choose this course?

This is a distinctive programme taught by an internationally renowned, interdisciplinary team of University of Galway experts in the field.

The course fee is eligible for subsidy by Technology Ireland ICT Skillnet under the Training Networks Programme of Skillnet Ireland and by member companies. Skillnet Ireland is funded from the National Training Fund through the Department of Education and Skills.

Course Overview

Artificial Intelligence (AI) has been at the forefront of computer science research for over 50 years. In recent years a confluence of breakthroughs in hardware capability and insights into algorithm design have made the early promise of intelligent machines a reality. AI is one of the fastest growing areas of ICT industry and research.

This is an intensive and technically rigorous programme. The estimated workload is 20 hours per week during the teaching semesters.

Career Opportunities

This innovative online MSc in Artificial Intelligence will equip the student with state-of-the-art knowledge and practical skills that are increasingly sought after in industry today.

Duration

2 years, part-time

Average Intake

40

I found that it is very interesting, the modules have a wide scope in AI and introduced me to a wide variety of topics related to AI, like Statistics, different techniques to handle large scale data, excellent Python module, as well as the different topics on Machine Learning.
