Bachelor of Engineering

Why choose this course?

This course will help you to make an informed choice about the discipline in which you wish to specialise by enabling you to find out where your aptitude and interests lie. On successful completion of their first year exams, students will be able to transfer to the second year of one of the programmes within the School of Engineering or the School of Computer Sciences.

All Engineering Degrees at the University of Galway are professionally accredited by the statutory professional body, Engineers Ireland. This 'Accreditation' means that the degree has been assessed and approved to meet the educational requirements for professional Engineers.

Course Overview

Engineering is a wide area, covering such fields as civil, mechanics, electronics and computer technology. This course offers you the option of studying engineering in a general way for a year before going on to specialise in your chosen field in year two. It has been designed to help you make your choice about what professional engineering qualification you wish to study by giving you a year to study the basic concepts and fundamentals of engineering.

Career Opportunities

Depending on students' choice of engineering discipline, there is a wide range of career opportunities for engineers, in industry, universities, hospitals, medical institutes, government regulatory agencies, research, software companies, financial services, and much more.

Duration

1 year

First year alone taught me that engineering is all about thinking on your feet, sharing knowledge and getting creative with solutions, a lesson that I think is essential for any future career based in STEM.
