MSc

# Sustainable Resource Management: Policy and Practice

(Inter-institutional programme)

## Why choose this course?

The 12-month long course comprises new modules taught only at postgraduate level and aims to provide participants with the skills, knowledge and experience that are needed to pursue successful careers in managing environmental resources sustainably. The course will help develop government policy and economic recovery by producing top quality graduates who can contribute to a smart economy and hasten implementation of green technologies. Given the pressure on and competition for limited resources, the course applies an evidence based approach to developing solutions for all system users. Graduates will become technically fluent in selected environmental science theory, policy development, implementation and best practice.

## Course Overview

This novel course is a multidisciplinary approach to environmental sustainability devised by University of Galway and the University of Limerick (UL). The course meets the needs of those graduates with continued interest in a sustainability-based taught MSc and responds to market demands for graduates with more applied knowledge of the environmental sector.

## Career Opportunities

Opportunities exist within the green economy as governments, NGOs and corporations must work to meet environmental targets set under international obligations. Graduates work in the following areas:

- industry-based environmental management
- environmental analysis
- environmental consultancy
- agri-environmental advice
- waste management policy

## Duration

1 year, full-time

## Average Intake

15

**The multi-disciplinary aspect of the course has allowed me to explore different areas of research and work; from a researcher in circular bioeconomy to an ecologist in an environmental consultancy. The assignments were very beneficial in preparing me for this work and the combination of academic and practical elements of this course give an advantage going into the multi-faceted approach of research and consultancy work.**

Emily Marsh  
Ecologist
