Marine and Freshwater Resources: Management

University of Galway.ie

# **MSc**

# Marine and Freshwater Resources: Management

### Why choose this course?

This course sets out to equip students with a broad range of skills and an understanding of the fundamental concepts underpinning the functioning of aquatic systems, the ability to communicate about them in a meaningful way and the ability to make informed and responsible decisions regarding marine and freshwater resources.

Graduates will acquire transversal and multidisciplinary skills in science, communication and management, enabling them to take on roles within an industrial setting, or within a regulatory body or private consultancy firm.

### **Course Overview**

The MSc in Marine and Freshwater Resources: Management will enable graduates to develop a core understanding and advanced level of knowledge and skills in key areas relevant to the marine and freshwater environment. This will give them the skills required to start addressing some of the critical challenges' society will face during the 21st century from human impact on the aquatic environment.

## **Career Opportunities**

Careers such as project managers, consultants and advisors exist within public and private sectors in Ireland and elsewhere. In addition, the course will provide graduates with a portfolio of generic skills that will help them compete for PhD programmes and improve their ability for other research roles and upskilling for professionals in Local Authorities, government, regulatory and industry.

### Duration

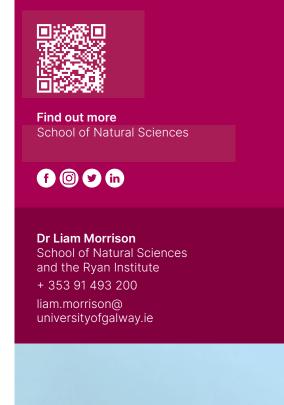

1 year, full-time

### Average Intake

20

I would highly recommend this Master's course to anyone interested in improving their understanding of the processes and interactions which help shape the aquatic environment and how they are impacted by human influences.
