ME Civil Engineering

Why choose this course?

This Level 9 degree programme is ideally suited to graduates with an honours Bachelor's degree (Level 8) in Civil Engineering, wishing to become more competent in advanced Civil Engineering topics and to accelerate to positions of leadership within companies. The programme meets the educational requirements necessary for progression to Chartered Engineer status with Engineers Ireland; with most recent accreditation in 2022.

Course Overview

The 60 ECTS Master of Engineering (ME) at University of Galway is part of an integrated (Bachelors + Masters) 4+1 programme of study, meeting the European Framework Standards for engineering accreditation. The programme is broad and design-focussed, with three primary elements: (i) advanced core and optional modules in Civil Engineering, (ii) modules on transferrable skills/professional development and (iii) an individual capstone research project, often aligned with ongoing PhD research. The flagship Integrated Design Project in Civil Engineering, conducted in groups, is a challenging but highly rewarding component of the programme.

Career Opportunities

Graduates of the ME in Civil Engineering at University of Galway are highly sought after by the Civil Engineering profession both nationally and internationally, with graduates working in consultancy, contracting, local authorities, government bodies, management and research and development roles.

Duration

1 year, full-time

Average Intake

30

After almost 5 years, I can say with confidence that choosing Civil Engineering at the University of Galway was one the best choices I have ever made. I have gained a wealth of knowledge that will no doubt shape my career in the years to come and I have made friends for life.

Ciara Mac Carthy
