Unlock your Future in *International Finance*

Course Overview

Dive deep into the global economy and financial markets with our MEconSc in International Finance. This programme is designed to enhance your understanding and technical skills using essential financial analysis tools like Stata, Python, and Excel. Stay ahead with a curriculum that focuses on current international economic policies, multinational investment flows, exchange rate dynamics, risk management, and asset pricing. Engage in computer simulation-based models to analyse financial data, providing a comprehensive view of both micro and macroeconomic factors.

Benefit from Ireland's thriving financial services sector, recognised for its high-value job opportunities and integral role in the nation's knowledge-based economy. Graduates of this programme are highly sought after by prestigious employers, including Goldman Sachs, J.P. Morgan, and the European Central Bank. Elevate your career prospects with the option of an internship, allowing you to apply your knowledge in a real-world setting and gain valuable industry experience. Make a global impact with a qualification that opens doors to opportunities in financial hubs around the world, from New York to London, and beyond.

Real-World Experiences: *Internship Opportunities*

Enhance your learning with the valuable opportunity of an internship, integrated within our MEconSc in International Finance programme. This hands-on experience allows you to apply the theoretical knowledge and technical skills gained during your studies to real-world financial challenges. By participating in a work placement, you gain practical insights and professional exposure that are crucial for your career development.

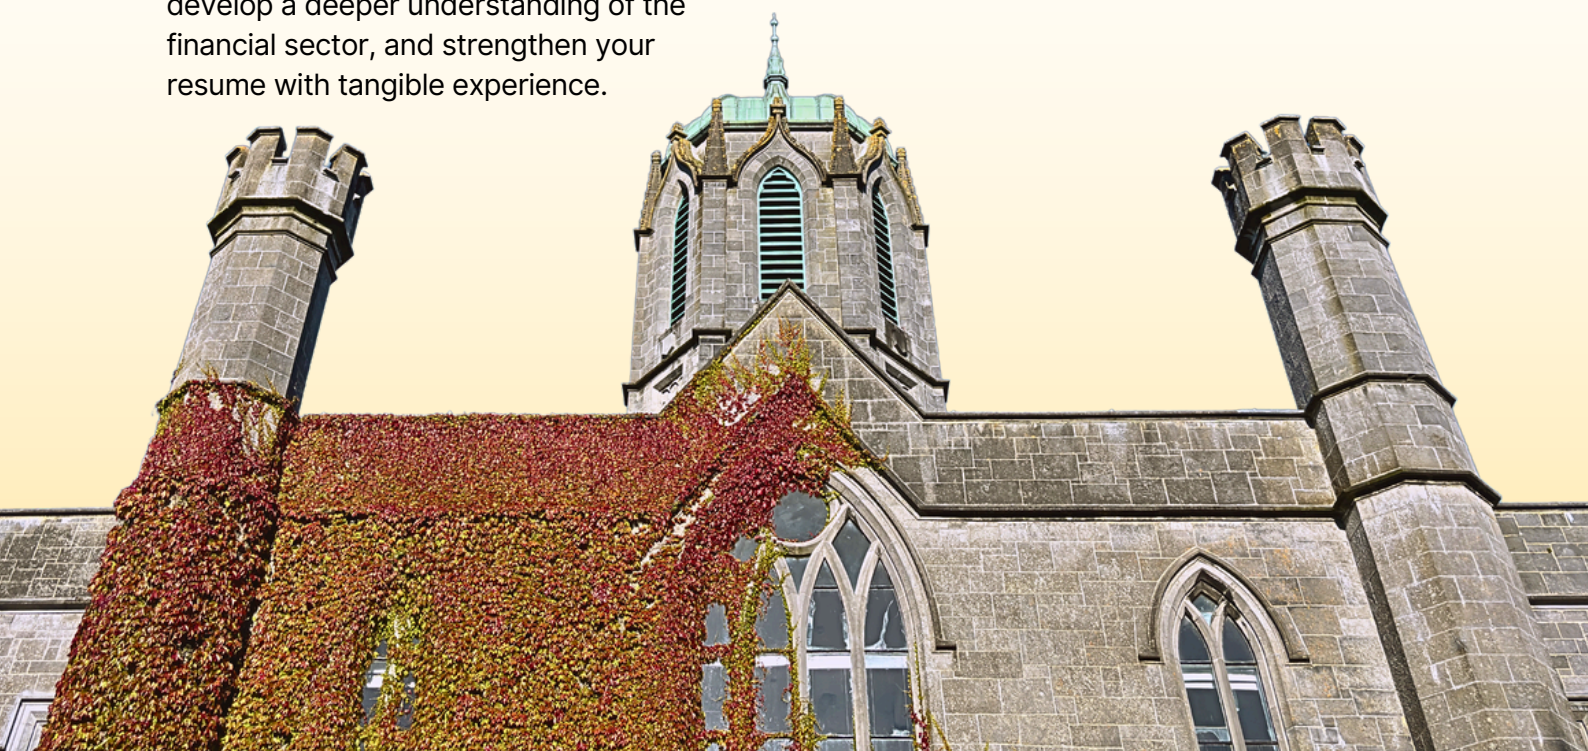

Completing an internship offers numerous benefits, including the chance to network with industry professionals, develop a deeper understanding of the financial sector, and strengthen your resume with tangible experience.

Work placements are competitive and subject to availability, but you also have the option to self-source your own placement, subject to approval. This flexibility ensures you can find an opportunity that aligns with your career goals and interests.

Internships not only enhance your employability but also provide a platform to showcase your skills to potential employers. Many of our students secure job offers directly from their internship placements, making this a significant stepping stone in your professional journey. Take advantage of this unique opportunity to gain a competitive edge in the job market and kick-start your career in international finance.

Student *Testimonials*

"... my degree gave me the opportunity to discover where my true professional ambitions lay and equipped with the tools in which to achieve these goals. The **Business Merit Scholarship**, which recognized my academic achievements and role as a University ambassador, not only eased my financial burden, but gave me the opportunity to fully immerse myself in the learning experience. As a result of my Master's degree and the Business Merit Scholarship, I have been able to secure a graduate job offer in the banking industry, a...

I highly recommend the J.E. Cairnes School and the Business Postgraduate Merit scholarship to aspiring students seeking a quality education and a promising future in the field of business and finance. "

"Pursuing the MEconSc in International Finance **has been of huge benefit to both my technical competency and personal development**. The program's comprehensive curriculum was taught by distinguished faculty. The modules equipped me with valuable knowledge of financial and economic theories, practical applications, as well as current industry trends.

The collaborative learning environment was great for my personal development, and I formed great relationships with the faculty members and classmates from diverse backgrounds. I highly recommend this program to anyone looking to excel in the field of finance and economics."

University of Galway*

Student *Testimonials*

" Pursuing MEConSc (International Finance) at the University of Galway was an amazing learning experience for me. The Finance aspect of the curriculum was more inclined towards current industry requirements. It came in handy for me during FRM Level I exams as it touched base on some of the core readings of the FRM curriculum.

The economics part focussed mainly on research and use of statistical tools. Throughout the year, we worked on several assignments, including a year-end dissertation that helped us groom these skills.

***The professors were easily approachable and helped us whenever it was required.** I would highly recommend this course to anyone who desires to pursue PhD or wants to get into Financial Services. "*

Antriksh Panwar

*" The MEconSc will equip any student with the necessary soft & technical, both quantitative & qualitative skills required to succeed in a very competitive industry. **A great feature of the MEconSc was the fact that you could deliver tutorials to students....***

I'm currently working for Irish Life Investment Managers (ILIM) where my current role is an Investment Analyst as part of the Performance team. Applied Portfolio Management was one of my favorite modules in the MEconSc & I regularly use the knowledge & skills I developed throughout this module in my day-to-day job. "
