BSc

Project and Construction Management

Why choose this course?

This degree programme prepares graduates for taking on technical, management, academic and research/development level positions in the construction industry, as well as across a range of other industries such as in the biopharmaceutical, technology and science industries.

You will learn about managerial and accounting principles, get an introduction to human resources management and progress to getting an insight into the concepts of financial management. Other focuses over the four-year programme are health and safety law, quality management and planning, which is evolving to take account of changing environmental concerns, and sustainability issues.

Course Overview

The BSc in Project and Construction Management is an interdisciplinary degree programme, providing students with an extensive training in both construction management and project management, essential managerial aspects to carrying out large, complex projects in industry.

Career Opportunities

The project management skills gained from the programme will be marketable across a wide range of industries that include technology, biopharma, and science.

Graduates will be qualified to work as construction project managers or their assistants, or engineering assistants, and in various supervisory positions, such as in building maintenance.

Duration

4 years

The BSc in Project and Construction is such an interdisciplinary programme that I was at a distinct advantage in gaining employment, having a firm understanding of a broad range of topics. The course also taught me to be adaptable.
